

4moms cleanwater™ tub

Clean water in, dirty water out. The 4moms cleanwater™ tub is designed to keep babies clean, safe and comfortable during bath time. It features a unique design which provides a constant flow of clean water, and a built-in, color-coded digital thermometer that makes it easy to ensure the water is always the perfect temperature. The cleanwater tub also grows with baby in 3 stages, making it the only tub you will ever need.

FEATURES

Constant Flow of Clean Water

The side drain allows dirty water to flow out while clean water constantly flows in. It also has a clean water reservoir and integrated rinse cup for easy rinsing. It's designed to fit most single- and double-basin sinks, and standard adult bathtubs.

Color-Coded Digital Thermometer

Color-coded digital thermometer helps you identify the comfort zone (green), maintaining a perfect and safe temperature for your baby.

Newborn Insert

Ensure a snug and secure fit for newborns with the removable newborn insert. *(newborn insert comes with tub)*

Age & Weight Limit:

Stage 1: newborn (cleanwater tub + newborn insert + sink) – 0-3 months, up to 15 lbs.

Stage 2: infant (cleanwater tub + sink) – 3-6 months or until baby can sit up unassisted.

Stage 3: older baby (cleanwater tub + adult bathtub) – 6+ months.
